I have placed Sara on the lists.

FYI on Lyndhurst:

Plans are in place to hold public information sessions in Lyndhurst on Wednesday, May 9 from 3 to 5 PM and 7 to 9 PM at Town Hall located at 367 Valleybrook Avenue in Lyndhurst.

I will send a note to the CAG tomorrow once I complete the flyer and give our elected officials a heads up. Broader outreach throughout the week. I would like to include the CAG communications committee on the draft messaging for their input.

That is wonderful. Should she be placed on the CAG email list?

FYI

Sara and her boyfriend attended the CAG meeting last night. It's nice to know that our meetings are attracting new stakeholders. Just sharing.

Hi David,

I was so glad to attend the meeting last night. Thanks again for welcoming me.

My doctoral work focuses on the sociocultural significance of ecological and industrial ruination in postindustrial cities like Newark. Right now i'm just trying to figure out some basic facts about the story of contemporary soil/water contamination. The links you've already sent me are a great help and from last night's meeting I can see how deeply complex this issue is. I'm also interested in ruination as a process that happens to underprivileged bodies, and especially bodies (both human and natural) exposed to chemical waste/toxins. This is another reason why I'm so interested in Newark.

Anyway--looking forward to joining the listserve.

All best,
Sara

Subject: lower 8+ miles of the Passaic

Dear David,

I'm a graduate student in American Studies at Rutgers-Newark and I'm looking for some data/information about water contamination in the lower Passaic (the lower 8+ miles). From what I can gather, it looks like this study is still in process. But I wonder if there are any (even partial) reports available at this time.

Thanks so much for your help.
